

2024 PLANETARY AGENDA

We have unfortunately been unable to produce the English version of the agenda this year because of health issues that are being taken care of now. We are looking forward to resume the English production for 2025.

This agenda is a tool for organizing our time in harmony with planetary movements. It contains a lot of technical information that can be extremely useful to those who know or have a desire to study the basic astrological laws. But it contains also interpretational texts briefly describing the astro-psychological atmosphere of each week.

A 15-page introduction gives tables explaining the various astrological symbols and their meanings, as well as basic explanations for the various "planetary events" that may happen and influence our lives during the year. This introduction ends with a survey of what to expect in 2024 from an astrological point of view, globally for the year, then on a monthly basis.

Novelties for 2023

- The new even more colorful cover is now laminated to provide more strength...
- This year, a calendar-like double page is added to get an overview of each month. On that page, monthly events are mentioned and interpreted, so that we also get a feeling of what kind of month this one is going to be!

... an overview

<p>Monthly Planetary Events</p> <p>Disturbance continues: still in eclipse time The ☾ eclipse is ♁ ♁ in ♏, the ☾ is therefore doubly weakened; lack of vitality, especially until May 19th. The ♁ motion also continues until June 1st, which can disturb communications.</p> <p>♀ ♁ = romanticism: good time for intimacy, for tenderness. Take advantage of this loss of vitality to rest with your family.</p> <p>New vitality: starting May 20th, ♁ enters ♁ where it is stronger, and the eclipses are over. Furthermore, ♁ just entering ♁ is ♁ ♁, which brings confidence and even audacity. But ♁ ♁ and ♁ ♁ can make people irritable...</p>	Monday	Tuesday	Wednesday	Thursday	Friday
